

TIGHTLOCK NETTING

Tightlock netting is New Zealand's most trusted prefabricated fence. Suitable for all high pressure stock applications Tightlock netting is manufactured using zinc/alloy coated 2.5mm wire for long life. Tightlocks knot technology and wire spacings provide economical permanent fencing solutions for deer, sheep and beef applications.

Applications:

DEER	1550mm and 1900mm heights available for traditional deer applications.
TOP UP	used to add height to existing fence as required instead of replacing entire fence.
FIELD	Suitable for sheep and beef.

Size range available:

TYPE	DESCRIPTION	LINE WIRES	HEIGHT (mm)	STAY WIDTH (mm)	LENGTH (m)
