

TWISTLOCK NETTING

Twistlock netting has been designed to provide farmers with fast and cost effective stock control solutions. Suitable for all high pressure stock applications Twistlock netting is manufactured using zinc/alloy coated 2.5mm wire for long life. Twistlock knot technology and wire spacings provide economical, permanent and temporary fencing solutions for sheep, beef and dairy applications.

Applications:

TYPE	USE
Permanent	Lambs, sheep, beef, dairy and horses
Temporary	Docking pens and tree-protection

Size range available:
